1. The Ucea-de-Sus Chemical Combine, near Fagaras, has started operations under the direction of Soviet specialists. The construction of this plant was started by German engineers prior to World War II.
2. A new type of explosive for guided missiles is being manufactured by the combine. The casing for this explosive is made by the Vulcan plant in Bucharest. Tests and demonstrations have recently been carried out at Ucea-de-Sus.
3. The plant employs about 3,500 workers, all carefully chosen and kept under surveillance. The area is rigidly controlled by guards and admission to the plant is permitted to workers only.
